PRO-3GSDI14

The PRO-3GSDI14 Distribution Amplifier allows SD-SDI, HD-SDI, and 3G-SDI signals to be split from one source to four SDI outputs for connecting to any SDI equipment.

PRO-H2-3GSDI

The PRO-H2-3GSDI Dual Output Converter accepts non-HDCP protected HDMI content and will convert to dual 3G-SDI outputs.

PRO-3GSDI42

The PRO-3GSDI42 Switching Distribution Amplifier accepts SD-SDI, HD-SDI, and 3G-SDI signals from four sources. Any source can be selected and then the source signal is split to two SDI outputs simultaneously.

The new CYP Professional Distribution Solutions offer the ultimate in flexibility and robust signal distribution for the broadcast market. The Professional Range includes SDI distribution and HDMI conversion solutions that enable engineers to confidently manage complex broadcast signal environments.
